## 1 Pilot Charter: A bottom-up sensor testbed

Fellow: Sergio Almendros Diaz

Mentor:

Advisor: Jaume Barcelo

## 1.1 Pilot purpose or justification

The purpose of this pilot is to build a sensor platform that can be attached to guifi nodes to gather and share sensory data.

# 1.2 Measurable pilot objectives and related success criteria

- Gather data about temperature, humidity, light and noise.
- Share the data as open data.
- Deploy at least two nodes and gather data for at least two weeks.

#### 1.3 High-level requirements

- Outdoor enclosure.
- Use open hardware and open software to the possible extent.
- $\bullet$  Use standardized interfaces to integrate with other projects.

#### 1.4 High-level pilot description

The goal is to use an arduino platform to create a bottom-up broadband wireless sensor networks. As guifi.net has already over 20,000 nodes, the idea is to co-locate the sensory platforms together with the guifi.net nodes and use the guifi.net network to transmit the data. This data should be gathered and shared. Ideally, the pilot should include a presentation interface for the users to visualize the data.

#### 1.5 High-level risks

A possible risk is that the prototypes are not rugged enough for outdoor environments. It is also a risk that the prototype is not stable and needs to be reset very often.

### 1.6 Summary milestone schedule

- From 20/09/2013 to 23/09/2013
  - Establish the general idea of the TFG and specifics goals.
- From 23/09/2013 to 11/10/2013
  - Specify the tasks to do and make a planning.

- From 11/10/2013 to 30/10/2013
  - Connect first sensors to the Arduino.
- From 31/10/2013 to 10/01/2014
  - Connect to guifi network and upload data to an open data platform.
- From 10/01/2014 to 01/06/2014
  - Integration of sensors and communication aspects.
  - Install prototypes.
  - Data sharing and visualization.
  - Data analysis and evaluation of the testbed.
- From 02/06/2014 to 30/06/20014
  - Preparation of the final memory.
- $\bullet$  From 01/07/2014 to the date of the presentation
  - Make the presentation.

## 1.7 Summary budget

The cost of this pilot will be approximately 4000. This quantity is for the scholarship to the student that will develop this pilot, budget for attending a conference or visiting collaborators, and the purchase of the necessary hardware.
